# The Zencity Community Survey

A recurring survey that never stops running, the Zencity Community Survey measures how satisfied residents are with their community and with local government-provided services and allows officials to compare these scores over time and against a cohort of similar communities.

## Survey Methodology

478 responses were were digitally recruited (e.g. over social media, mobile apps, local websites, and survey panels) between July – December, 2022. Zencity built a representative sample by matching respondent data to the U.S. Census Bureau's race, ethnicity, age, and gender distributions in Bettendorf. Finally, rake-weighting was applied as a statistical safeguard to balance out any remaining discrepancies in distribution, so no demographic group is overrepresented or underrepresented in the final score.

## Score Calculation

The overall satisfaction score is calculated by averaging how each resident rated quality of life and community characteristics on a numeric scale (1-5), and classifying this average as satisfied, neutral, or not satisfied. The resulting score, then, is the weighted percentage of residents who gave an overall satisfied rating.

# 83%

of 478 surveyed residents are **satisfied** with life in Bettendorf

The overall satisfaction score is calculated from the questions in the two main sections of the survey: general quality of life and satisfaction with different characteristics of life in your community.

We take the average of these questions, then classify the score as positive (3+), neutral (1.5 to <3), or negative ( $\leq 1.5$ ). The percentages represent the percent of respondents in each category.

If you have a previous cycle, the up (↑) and down (↓) arrows will show the change in percentage points.
