JW PROJECT E22159

**COMMISSIONERS' OATH
FOR RECLASSIFICATION OF
BREMER COUNTY DRAINAGE DISTRICT NO. 5**

In accordance with Section 468.38 of the Code of Iowa, we are resident freeholders of Bremer County in which Drainage District No. 5 is located. We are not living within, nor interested in any lands included in said district, nor related to any party whose land is affected thereby.

We agree to perform the duties of classification of said lands, fix the percentages of benefits and apportion and assess the costs and expenses of constructing the said repair according to law and our best judgment, skill and ability.

Signed 
Mark Halbach

Signed 
Danny Buls

Date 3/7/25

Date 3-12-2025

In accordance with Section 468.38 of the Code of Iowa, I am a Licensed Civil Engineer in the State of Iowa (License #24741).

I agree to perform the duties of classification of said lands, fix the percentages of benefits and apportion and assess the costs and expenses of constructing the said improvement according to law and my best judgment, skill and ability.

Signed 
Collin J. Klingbeil, PE

Date 3/14/25

**REPORT OF COMMISSION FOR CLASSIFICATION OF LANDS BENEFITED
IN
BREMER COUNTY DRAINAGE DISTRICT NO. 5**

Dear Board Members:

Pursuant to your action appointing the undersigned as commissioners to inspect and classify lands that are drained by Bremer County Drainage District No. 5 (DD5), we, as commissioners, subscribed to oath to perform said duty and proceeded to examine the drainage system and the lands the system was designed to serve.

Drainage District No. 5 was established in approximately 1920. An extensive tile system was constructed as part of the original improvements. See enclosed drainage plat map. Note that all tile shown on maps are approximate in location, and have been drawn to the best of our ability with the information available to us without physically locating/digging up the tile.

An improvement and re-route of a portion of the Lower Main Tile was completed in 2024. An assessment schedule has been developed as part of this reclassification for this project. The estimated levy amount for this project is **\$542,000**, which is the cost basis we used for the schedule we developed. We recommend that this schedule be used **ONCE**, to pay for the 2024 improvements. Future maintenance to **any** portion of the Lower Main Tile system should be assessed based on the Lower Main Tile schedule which is also included in this report.

As part of the improvement project, approximately the lower 2,500 feet of the original 36-inch diameter Main Tile was crushed and replaced with dual-wall HDPE pipe ranging in size from 12-inch to 8-inches in diameter. Moving forward, the new dual-wall HDPE pipe is considered to be private tile, not a district facility. Future maintenance on this tile will **not** be the responsibility of the drainage district. Much of the area drained by this private tile also is not included in the future maintenance schedule for the Lower Main Tile.

Additionally, the Main Tile improvement and re-route ran across the NW SE ¼ of Section 16 of Maxfield Township (T-91-N, R-12-W), which is not currently in the district. Private tile encountered in this property was connected to a sub-main which connected either to another private tile or directly to its own outlet. No private tile on this property were connected to the new 42-inch diameter tile. It is our opinion that there is no material benefit to this parcel. However, under Iowa Code 468.27 there exists a permanent easement for the drainage district to access the tile through the property for maintenance, inspection, repairs, and improvements.

We separated the district facilities into the following schedules for levying the costs of future repairs:

1. Lower Main Tile
2. Upper Main and Main Lateral 1 Tile
3. Sub-Main 1 Tile
4. Sub-Main 2 Tile
5. Sub-Main 3 & Sub-Main 3 Lateral 1 Tile
6. Sub-Main 4 Tile
7. Sub-Main 5 Tile

We note that Sub-Main 5 Lateral 1 tile (part of the originally constructed tile system) was rerouted and replaced as part of the 2019 stormwater wetland project for the City of Readlyn. Until the wetland was constructed, the tile carried stormwater runoff from the City. We now consider it to be abandoned.

We also note that there is an agreement dated November 14, 2016 between DD5 and the City of Readlyn allowing the City to discharge effluent from their wastewater treatment plant into the DD5 tile system. This agreement covers only the discharge of treated sanitary wastewater to the tile system. Stormwater runoff and general drainage from the properties is covered as part of this reclassification.

Classification is required to be equitably based on benefit received from the district facility. As such, each tract of land has been inspected and classified on a graduated scale of one hundred (100) as per Iowa Code Section 468.39, where the parcel with highest benefit is marked 100 and the remaining parcels are marked as a percentage in proportion to the highest benefiting parcel.

Benefits of a drainage district facility may include, but are not limited to, providing an outlet for the drainage of said lands, bringing an outlet closer, relieving the lands from overflow, and protecting and relieving the lands from damage by erosion.

In order to quantify benefits we considered several factors. The combination of all the benefit factors for a particular tract determines its overall benefit. A general description of the factors considered is included below.

- **Land Area:** the more land area in a particular tract that utilizes a district facility, the more benefit the tract receives from said facility.
- **Soil Type:** looks at the need for drainage based on the soil type of the land and their corresponding characteristics in relation to drainage. The soils that would benefit the most from drainage in an agricultural setting are generally those that are frequently flooded/ponded, are poorly drained, and would be prime farmland if drained. Conversely, soils that are naturally well drained have less of a need for supplemental drainage and thus have a lower benefit from a drainage district facility.
- **Distance from the Facility:** looks at how far the parcel is away from the district facility. The distance is determined based on topography and how water would flow, not as a straight line distance. Lands closest to the district facility have the advantage of ease of access, whereas lands further from the facility must utilize a much more substantial system (private or district) to utilize the facility.
- **Use of the Facility:** looks at how much of a district facility is used in draining the land. In other words, for a district tile one (1) mile in length, lands whose water flows through the entire length of tile should pay more than lands near the downstream end of the tile whose water only flows through a fraction of the length of the system.
- **Generation of Runoff:** looks at how much surface runoff is generated on the land from a rainstorm. The more runoff generated, the higher the benefit. Cropland generates less runoff than paved surfaces such as roads, and thus has a lower runoff factor than gravel or paved roads.

We hereby submit our report, in tabulated form setting forth:

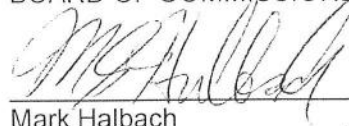

1. Parcel Number
2. The names of the owners as shown by the transfer books of the auditor's office
3. Section – Township – Range
4. Legal description
5. Benefited Acres

6. Benefit Units, calculated benefit units based on our classification. Can be considered a conceptual assessment dollar amount assuming the sum of all assessments in the schedule is equal to the levy. The proportionality will not change with any amount levied against the assessment schedule.
7. The classification of benefits derived relative to a 100% benefit assigned to the tract having the greatest benefit
8. Percent of Total Benefit

It is the recommendation of the commissioners that this report be adopted.

Respectfully submitted,

BOARD OF COMMISSIONERS

Mark Halbach

Danny Buls
